

# GL1800 Garmin GPS MIC Interface

*Item #: HGW-GPS-MIC*

Installation is plug and play under the left hand fairing pocket, remove the pocket per your users manual and trace the headset cable down until you find the red headset connection, unplug this connection and install the HGW-GPS-MIC in between, run the 2.5mm microphone cable to your GPS and you will now have an microphone feed to your unit, you will need a additional cable from your GPS output to your AUX if not already present. (Sold separately)

Compatible with Garmin models Aera 500,510,550,560 Nuvi  
300,310,360,650,660,670,680,760,765T 770,775T,780,785T,880,885T, StreetPilot  
c550,c580,2820, Zumo 550,660,665

Should also work with other devices requiring a 2.5mm microphone input.

Please consult your GPS user guide to make sure your unit has the correct connections present either on the unit or its cradle some models require extra parts to allow a microphone input

Follow the settings in your GPS user manual for how to use a microphone with your unit
